

REMARKS/ARGUMENTS

This is in response to the Office Action of April 15, 2008.

In that Office Action, the drawings were objected to under 37 CFR 1.83(a) as not showing the claimed feature of a channel roof including a notch. By this amendment, the feature of said channel roof includes a notch was canceled. Applicants reserve the right to claim this feature in a continuing patent application. Applicants respectfully submit that the drawings are in proper form and that the rejection to the drawings should be withdrawn.

Also in that Office Action, Claims 23, 16-18 and 21-22 were rejected under 35 U.S.C. 112. The last two lines in Claim 23 stating "said channel roof includes a notch and wherein said laterally extending head has a tooth that rocks upwardly into said notch" were stated to be confusing. By this response, Claim 23 has been amended by deleting the last two lines and by adding additional language to more clearly and distinctly claim the invention. Applicants reserve the right to claim this feature in a continuing patent application. Claims 16-18 and 21-22 depend upon Claim 23. Applicants respectfully submit that Claims 23, 16-18 and 21-22 are in condition for allowance and that the rejection under 35 U.S.C. 112 should be withdrawn.

Additionally in that Office Action, Claims 16-18 and 21-25 were rejected on the ground of provisional nonstatutory obviousness-type double patenting over Claims 1-10 of copending Application No. 11/022,525. Applicants reserve the right to file a Terminal Disclaimer if still required at such time as the copending application is allowed.

Therefore, a reconsideration and allowance of claims 16-18 and 21-25 of this application are requested.

Date: July 15, 2008
